Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 21-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Bolie.

Bolie teaches a ladder network circuit: including that the circuit is designed based on a human cochlea (see Col. 1, lines 53-66, and Col. 2, lines 25-35); the circuit is tuned to a frequency thus it can be considered a filter element; the circuit can be used in radio frequencies (see Col. 1, lines 10-15); an input and output (Claim 21); an oscillator can be used for inputting a signal (i.e. a transmitter) (see Col. 4, lines 50-55); inherently a response is present at the output such that the circuit is functional (Claim 22); and the circuit is capable of being controlled to affect its characteristics(Claim 23).

Allowable Subject Matter

3. Claims 1-20 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not teach a transmission line having a characteristic impedance which increases at a first substantially exponential rate and a plurality of resonators positioned along the transmission line and having resonant frequencies that decrease at a second substantially exponential rate with respect to the distance from the input.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Haronian et al. teaches an acoustic filter designed based on a cochlea.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen E. Jones whose telephone number is 703-305-0390. The examiner can normally be reached on Monday through Friday from 8 AM to 4 PM.
